

# CodeXcelerate 2025

**Project Title :** HackMate - AI Powered Hackathon Companion

**Team Name :** Bug Life

**College Name :** DJ Sanghvi College Of Engineering

**Team Members :** Tanish Shah, Swarali Pednekar, Swayam Shah  
Tanay Mehta, Yash Manek

# PROBLEM & PROPOSED SOLUTION

## Problem

- **Bad planning** makes teams lose time and energy, stopping them before they can even get going properly.
- **Wrong skills in a team** mean some people do too much while others can't help, causing fights and delays.
- **Tough deadlines with no breaks** tire everyone out fast, leaving them too **worn out to think of good ideas**.
- **70%** of teams **don't finish** their projects because mess and stress pile up and ruin everything.

## Innovation and Uniqueness

- Our AI nails **task planning** like no other, making it sharp, fast, and spot-on every time.
- No tool mixes work and health like this—it's a whole new way to **win hackathons with less stress**.
- **Post-hackathon stats** lift skills and make your work pop for the future.

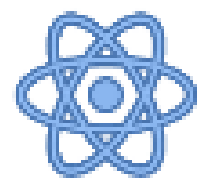

## Solutions

- **Smart Team Matchmaking** creates balanced teams using GitHub profiles, eliminating awkward networking.
- **AI Problem Breakdown** transforms complex challenges into clear tasks within minutes.
- **Intelligent Task Distribution** assigns work based on GitHub contributions, maximizing strengths.
- **Real-Time Dashboard** shows tasks, commits, and timeline in one view, preventing surprises.
- **Resource Engine** suggests **optimal tools** for your project, cutting research time significantly.
- **All-in-One Suite** integrates boards, canvas, and documents, eliminating context switching.
- **Wellness Assistant** provides timely breaks, maintaining team energy throughout the hackathon.

# TECHNICAL APPROACH

## Tech Stack

### Frontend

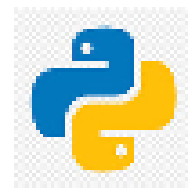

React.js

Tailwind CSS

### AI & NLP Integration

Python

Flask

### Integration

Node.js

MongoDB

### Backend

Firebase

Docker

### Real-Time Communication

Socket.io

## From Start to Finish: Navigating the Hackathon Journey

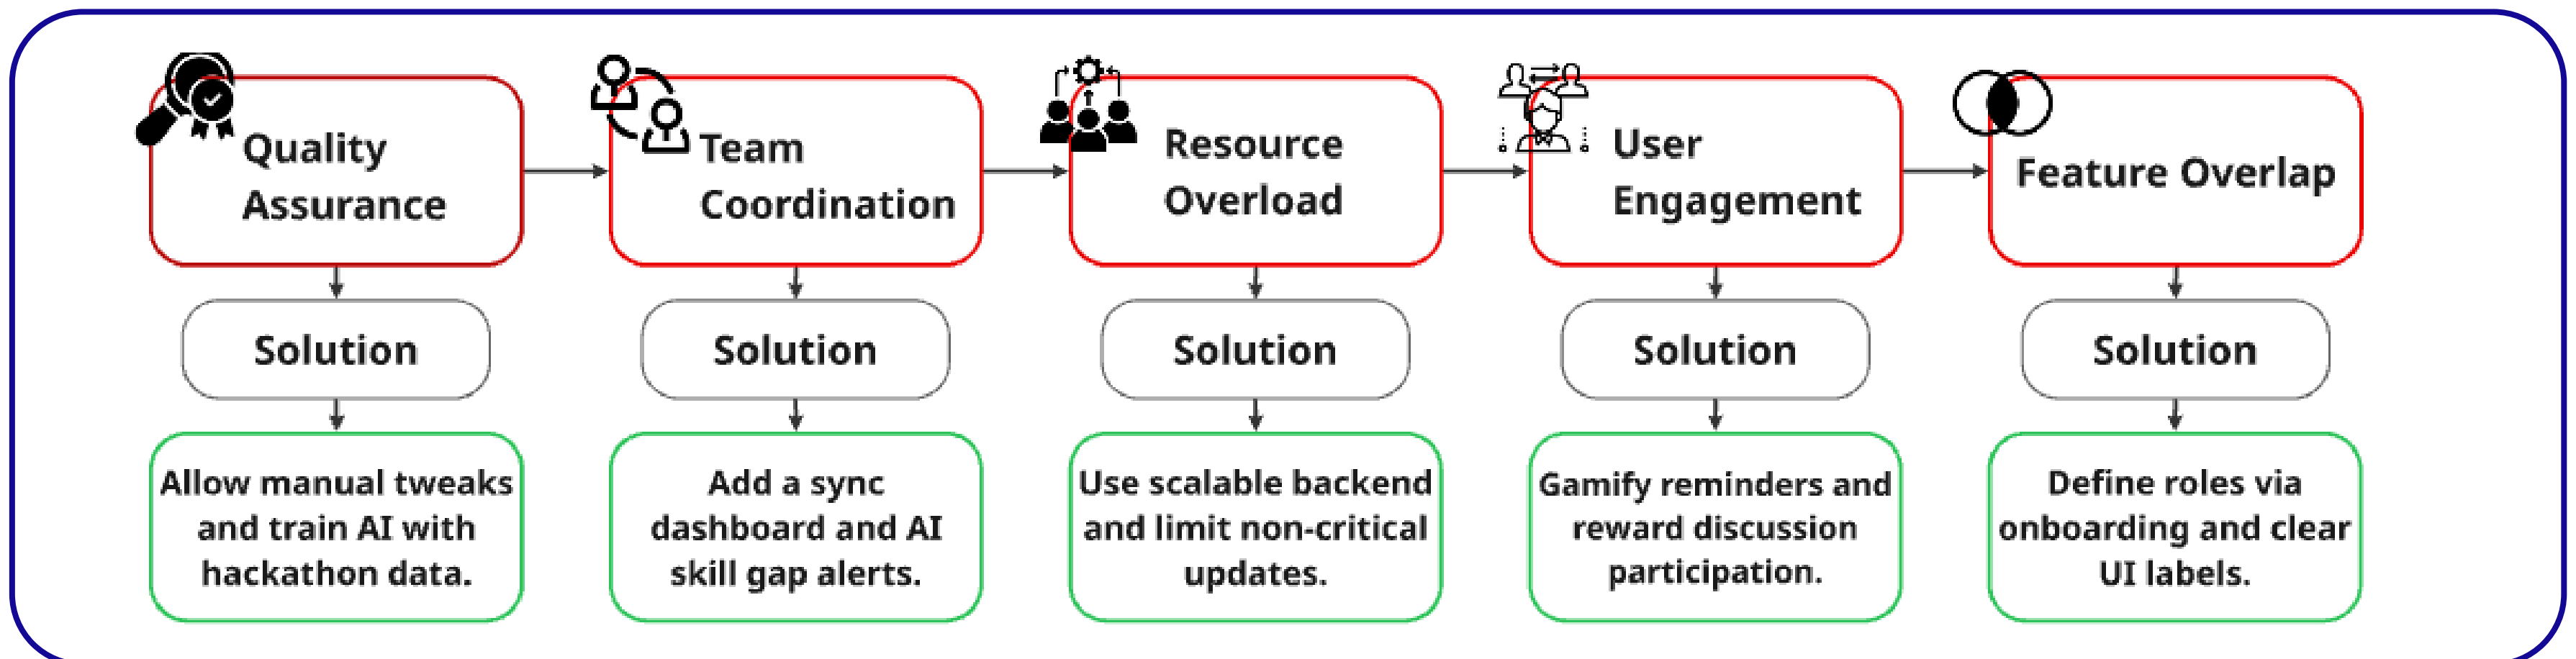

# FEASIBILITY AND VIABILITY

## Feasibility of Idea:

- **Real-Time Collaboration:** Enables fast-paced hackathon teamwork with seamless canvas syncing for group ideation.
- **Mentorship Value:** Meets the need for guidance by offering an AI assistant to plan and delegate tasks, enhancing success for all skill levels.
- **Streamlined Workflow:** Combines skill profiling, task breakdown, and collaboration tools into one platform, driving team efficiency.

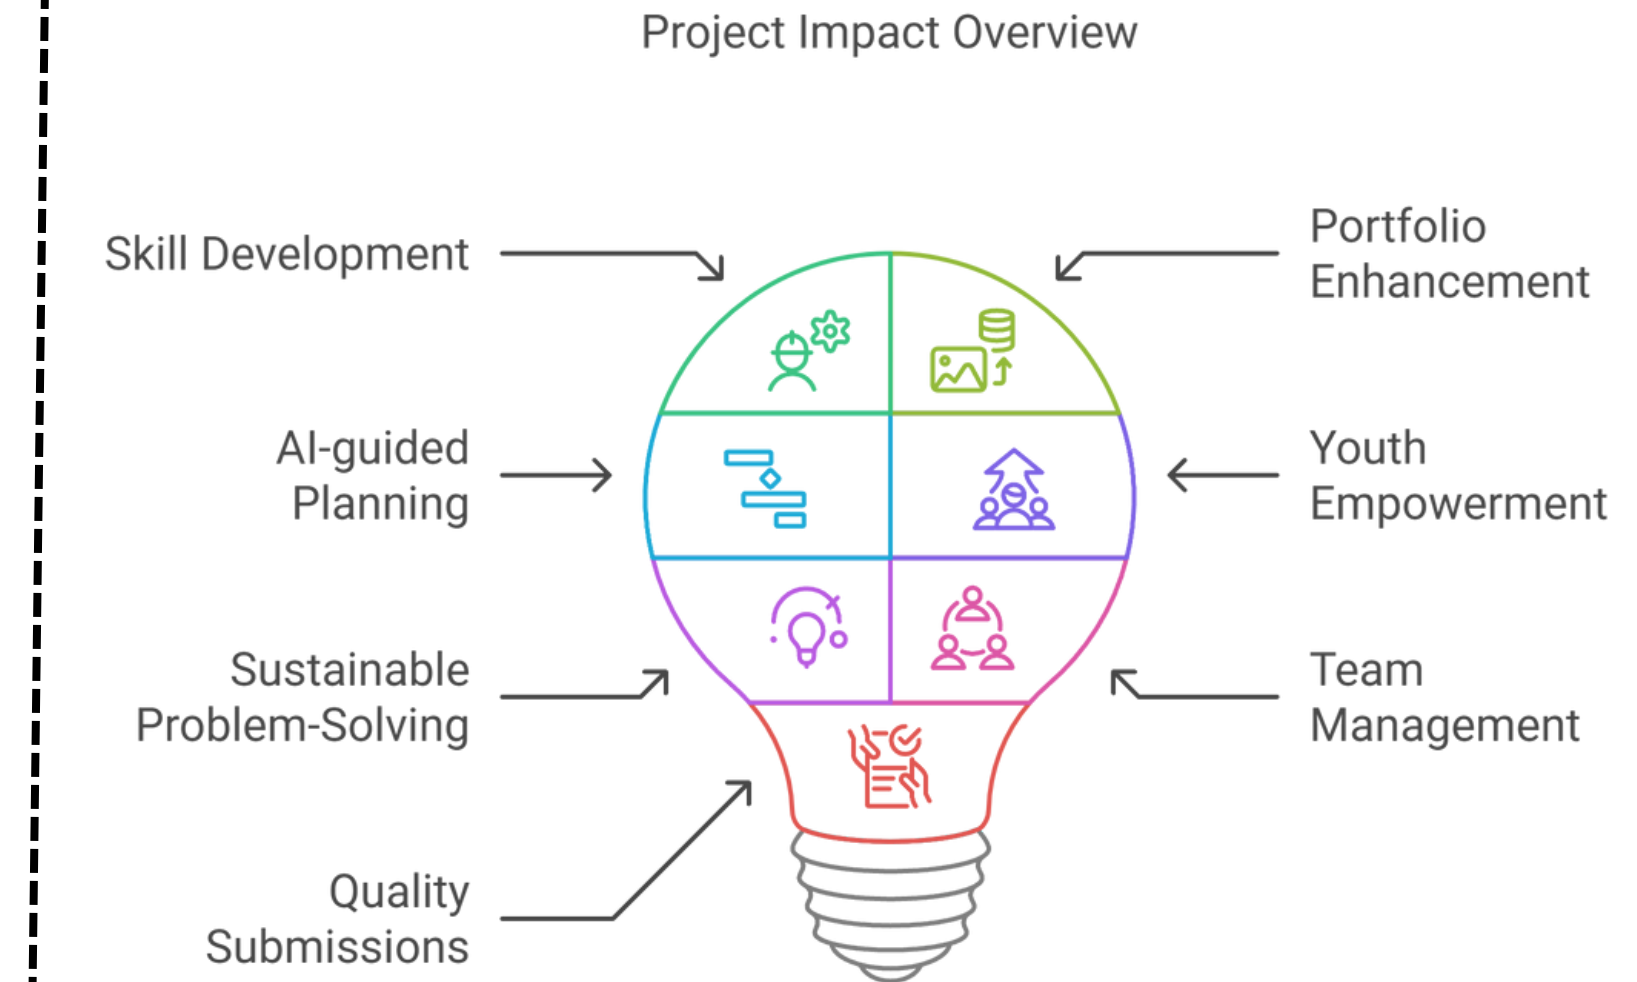

## POTENTIAL PROBLEMS AND THEIR SOLUTIONS:

# IMPACTS & BENEFITS

- **Enhanced skill development and practical learning:** Helps participants gain hands-on experience and improve technical skills.
- **Stronger portfolios with structured contributions:** Tracks individual contributions, enhancing resumes and career prospects.
- **Reduced stress with AI-guided planning and execution:** AI-driven mentorship simplifies workload distribution and project execution.
- **Empowers India's youth to innovate effectively:** Encourages young minds to create impactful solutions for real-world challenges.

- **Drives sustainable, tech-driven problem-solving:** Supports innovation in key areas like AI, sustainability, and healthcare.
- **Efficient team management and structured progress tracking:** Ensures smooth collaboration with clear task allocation and milestones.
- **Quality submissions of the project:** Enhances final project outcomes through guided development and structured execution.

## CONCLUSION

Our **AI-powered hackathon mentor** revolutionizes the way teams plan, collaborate, and execute projects. By integrating **skill-based task allocation, AI-driven guidance, real-time progress tracking, and GitHub contributions analysis**, we ensure an **efficient and stress-free hackathon experience**.

This platform not only **enhances skill development and teamwork** but also **streamlines project execution, boosts completion rates, and improves submission quality**. With **personalized AI bots, structured timelines, and intelligent resource recommendations**, teams can focus on innovation rather than logistics.

Our solution **empowers young innovators, promotes sustainable tech-driven problem-solving, and fosters a culture of impactful creation**. This platform transforms hackathons into **high-impact, well-structured innovation hubs**.

**THANK  
YOU**
